EFFECTIVE IMMEDIATELY

PERMIT APPLICATIONS – READY/HOLD

The City of Okeechobee Building Department is informing everyone that once a permit application is ready or on hold, you will have thirty (30) days to either pick up the permit or bring in any requested items. If you are not able to provide the required information within the thirty (30) days, your permit will be voided. Once an application has been voided, you may submit a new permit application at any time with updated or corrected documents.

Work can not begin prior to the posting of the permit unless the Building Official has authorized the request. Otherwise, it will be commencing work without a permit and may be subject to a code enforcement citation and additional permit fees will be applied.

Emergency permits for failed air conditioning systems, electrical, plumbing, and roof repairs will require a verbal authorization from the Building Department with the permit application being submitted within five (5) business days from the approved request. Failure to do so will result in a code violation citation for doing work without a permit and additional permit fees will be applied.

Contractors shall schedule required inspections accordingly.

Jeffery C Newell, Building Official
